

## ANIMALS

### *cche BASICS Lesson 3*

#### READ MORRISON'S INTRODUCTION CHAPTER

#### ANIMAL REMEDIES FOR LESSON 3

- Read Murphy's for common names, information on how the remedy was made (under the Pharmacy section) and compare with the information found in Morrison's
- Ambra Grisea (Ambergris) (Sperm whale secretion)
  - <https://en.wikipedia.org/wiki/Ambergris>
- Apis mellifica
- Badiaga (Fresh water sponge)
- Blatta orientalis (Oriental cockroach)
- Bothrops lanceolatus (Yellow viper or Fer-de-lance snake from S. America)
- Bufo rana
- Cantharis
- Castor equi (Rudimentary thumbnail of the horse. Triturations are made from the scales of rudimentary thumb-nail of the horse.) (Not in Murphy's)
- Coccus cacti
- Corallium rubrum
- Crotalus cascavella
- Crotalus horridus
- Drosera
- Elaps
- Formica rufa
- Hydrophobinum (Lyssinum)
- Lac caninum
- Lac defloratum
- Lachesis
- Latrodectus mactans
- Mephitis
- Moschus
- Murex
- Naja
- Oleum animale
- Sepia
- Spongia tosta
- Tarantula cubensis
- Tarantula hispanica
- Theridion

#### ANIMAL REMEDIES

- Look up words you don't know and write the definition in the book (I promise you, you'll forget it once or twice and have to look it up again).

- Read about these remedies in both Morrison's Desktop Guide and Murphy's Nature's Materia Medica
  - Take note of what animal the remedy was made from and how it was made
- Practice looking up symptoms in Kent's and Complete Dynamic repertories
- Prepare for a 20-question closed book quiz

Important

- 
- **WARNING: Be careful about thinking what you are reading matches someone you know or yourself**
